# LAMBERT ADITAMA SOEHARDJIANTO

Jakarta, Indonesia | +62 812 9100 6669 | lambertaditama@gmail.com | lambertas.github.io
linkedin.com/in/lambert-aditama-soehardjianto | researchgate.net/profile/Lambert-Aditama-Soehardjianto

Data and business analyst finishing a nine-month HR information systems internship at a national supermarket chain of more than 12,000 employees. Works between HR and IT: gathering requirements, writing BRDs, running UAT, and building survey analytics, dashboards and workflow automation in SQL, Python, Power BI and Apps Script. Computer Science and Statistics graduate from BINUS (GPA 3.72) with two IEEE conference papers, including first authorship at ICISS 2026.

## WORK EXPERIENCE

**PT Lion Super Indo, Jakarta, Indonesia** February 2026 - October 2026

*Data Analyst Intern, Human Resource Information System (extended from 6 to 9 months)*

- Built a Python pipeline for the annual pulse survey that maps about 9,000 responses to 88 reporting units, trims over-responding units by stratified sampling and generates one PowerPoint report per unit. Handed it to HR for future cycles.
- Moved the quarterly scoring tracker for a one-year store internship programme from Excel and Power Query to Google Sheets, fixing summed duplicate submissions and a locale error that swapped day and month on 700+ start dates.
- Wrote a Google Apps Script reminder that emails each store one table of interns with missing scores and resumes safely after the daily email quota. A test run produced 154 store emails covering 470 interns.
- Cleaned four years of HR service ticket data (2022 to 2026) and traced 211 misaligned survey rows to a partial spreadsheet sort, then wrote a prevention procedure.
- Rebuilt the HR ticket SLA report as a Power BI dashboard with a separate lookup table for category-specific SLA targets, and presented it to the Department Head and General Managers.
- Wrote two Business Requirement Documents and contributed to a third, all approved and taken into build, and designed role-based Figma prototypes for three access levels.
- Ran two-phase UAT on the appraisal module: 15 scenarios, 20 defects retested to closure. Wrote the user manual.
- Built a resumable faster-whisper notebook on Google Colab to transcribe about 30 hours of Indonesian recordings, after comparing tools against data-protection criteria in a brief for the Department Head.

## EDUCATION

**BINUS University, Jakarta, Indonesia** August 2022 - August 2026

*Bachelor of Computer Science and Statistics, GPA 3.72 / 4.00*

Relevant coursework: Machine Learning, Multivariate Statistics, Regression, Time Series Analysis, Data Mining, Databases.

## SKILLS AND CERTIFICATION

**Programming and Analysis:** Python (pandas, NumPy, scikit-learn, statsmodels), R (tidyverse, ggplot2), SQL, Apps Script, Excel
**Business Intelligence:** Power BI (Power Query, DAX, data modelling), Google Sheets (QUERY, ARRAYFORMULA), Looker, KPIs
**Business Analysis:** requirements gathering, BRDs, functional specifications, cost-benefit analysis, process mapping, UAT, Figma
**Statistics:** regression, classification, imbalanced-data methods, hypothesis testing, sampling design, time series
**Certification:** HackerRank (2026): SQL (Advanced), R (Intermediate), Problem Solving (Intermediate), Software Engineer (Role)
**Languages:** Indonesian (native), English (fluent), Mandarin (conversational)

## RESEARCH AND PUBLICATIONS

**Learning from Imbalanced Stroke Data: SMOTE vs SMOTE-ENN** IEEE ICISS 2026

First author. Compared three resampling regimes across logistic regression, SVM-RBF and XGBoost on 5,110 records at 4.87% prevalence, ranked on PR-AUC and recall rather than accuracy. DOI: 10.1109/ICISS71466.2026.11715456

**Evaluating the Jellyfish Optimization Algorithm for Feature Selection** IEEE iCAST 2025

Second author. Implemented the algorithm from scratch and benchmarked it against a no-selection baseline across five classifiers. DOI: 10.1109/iCAST68191.2025.11300257

## LEADERSHIP

**HIMSTAT BINUS, Project Manager, Statistics Competition Delegation** February 2023 - February 2025

Ran a statistics competition for 50+ participants and coordinated leadership training for incoming committee members.

**SASC Mentoring Scholarship, Mentor (competitive selection, scholarship-funded)** August 2025 - February 2026

**Teach for Indonesia, BINUS, Education Volunteer** August - September 2023

Delivered 10 structured mathematics sessions for secondary students.
